DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group I, species 1 from species set 1 and species 1 from species set 2 in the reply filed on August 23, 2007 is acknowledged.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless —

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 8 and 12 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Winchell (USPN 3,097,366).

Winchell discloses a pumping system having a pumping portion (56) having an inner cross-sectional area (56 Fig. 5) which is deformable, the pumping portion is connected (65) to a system through which fluid is to be pumped. There is an actuating part (72, 80, 76) that changes the inner cross-sectional area without ever completely closing off the inner cross-sectional area.

Claims 2-4, 7-10, 13 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Birtwell (USPN 3,099,260).

Application/Control Number: 10/761,895
Art Unit: 3746

Page 3

Birtwell discloses a tube pump having a tube (30) which is actuated by a mechanism (the piston mechanism clearly shown in Fig. 1) that is controlled by a feedback mechanism (the device shown in Fig. 6 and described at the top of col. 10). Col. 5 lines 60-65 note that tube pumps do not have to be completely occluded.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Winchell in view of Sites et al (USPN 6,413,233).

As set forth above Winchell discloses the invention substantially as claimed but does not disclose a feedback controller. Sites discloses a feedback control system (Fig. 2A) having a pump(320), sensors (201, 202, 203) and a controller (111). At the time of the invention it would have been obvious to add a feedback control system to the pump of Winchell in order to allow for the precise control and adjustment of the pump in response to sensed conditions.

Claims 2-4, 6 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shellman et al (USPN 2,888,877) in view of Masoka et al (USPN 6,299,600).

Application/Control Number: 10/761,895
Art Unit: 3746

Page 4

Shellman et al discloses a tube pump (16) having an electrically actuated part (22, 24) that is controlled by an element that is manually adjusted or controlled (36,38). Shellman et al does not disclose the use of a feedback controller. Masoka et al discloses a feedback control system for a liquid pump. At the time of the invention it would have been obvious to one of ordinary skill in the art to substitute a feedback controller such as taught by Masoka et al for the manually adjustable control of Shellman et al in order to create a more precise control.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
